Travel on Arrowbear Drive to Become Safer

Travel along Arrowbear Drive, between Lake View and Sierra View Drives, will become safer once installation of new guard rail is completed.

“It is important that we make our roads as safe as possible and this project will provide added protection for motorists using Arrowbear Drive,” said Supervisor Dennis Hansberger.

Today, the Board of Supervisors approved a \$26,530 contract for construction of the improvements with William Kanayan Construction, at a cost significantly less than the engineer’s original estimate. “The competitive bidding process is working, and it is great to see the cost of projects less than we estimated, “ said Supervisor Hansberger. Work is scheduled to start by the beginning of July and be completed in approximately one month.
